## ПРОЦЕДУРА ВОССТАНОВЛЕНИЯ БАЗЫ ДАННЫХ SQL сервера системы мониторинга TELEVIS GO

При наличии ошибки базы данных (DB), т.е. иконки 🚺 на странице входа в систему, с помощью следующей процедуры можно восстановить Исходное состояние Базы данных (DB):

- a. Остановите Televis Go Service используя иконку в строке инструментария Windows.
- b. Остановите сервер SQL Server из окна Сервисов Windows Services (Панель управления\Администрирование\Управление компьютером\Службы и приложения\Службы)
  – смотри рисунок ниже.
- с. Откройте папку MSSQL ( C:\Program Files\Microsoft SQL Server\MSSQL10\_50.MSSQLSERVER\MSSQL ).
- d. Скопируйте все файлы из папки "DATA\_backup" в папку «DATA».
- e. Перезапустите сервер SQL Server и Televis Go service.

ПОМНИТЕ: В блоках ранних версий в папке «MSSQL» папки «DATA\_backup» может не быть.

Обратитесь в отдел технической поддержки Eliwell для получения файлов этой папки если в Вашем

блоке этой папки нет.
